About

Finally, someone has thought about the admins. Templates are mostly dedicated to the people who are using the website - not for those who create and manage them. We know that work on the illegible dashboard is annoying, therefore, we've created the package of the templates with the aim of the admins only. Let your website be great-looking also for yourself.

Main features:

>

G Material Design by Google

Similar design quality to the one offered by Google's tools gives you a clear view of your data.

Insightful layout

The intuitive and informative style is a key to better understanding your aggregated data.

Clean categorization

Each piece of information is connected with the corresponding category for even better clarity.

Not enough?

Built exclusively for its purpose

We are aware of the needs and challenges standing before the skilled web administrators.

Fully responsive

You can be sure that your data will always be displayed perfectly both on desktops and mobile devices.

Easy to customize

In some cases, your needs might need different solutions than those we present you. Because of that, we leave the full option of customization to you.

Relevant to any websites

With all the website topics you can imagine, our template covers the data layout requirement for all of them.
